01. COMPANY OVERVIEW

Agex Ventures is a diversified infrastructure and industrial services enterprise headquartered in Jaipur, Rajasthan — one of India's fastest-growing industrial and construction hubs. Founded with a clear mandate to deliver world-class project execution, Agex Ventures has established itself as a competent and ambitious player across two of the nation's most critical economic sectors: Civil Construction and Oil & Gas Services.

We are a company built on the conviction that India's infrastructure growth story demands contractors and service providers who combine technical depth with financial discipline, operational scalability, and an unrelenting focus on quality and safety. Agex Ventures embodies this philosophy across every project it undertakes.

From landmark residential developments and complex road infrastructure to high-stakes pipeline installation and oilfield support operations, Agex Ventures brings together engineering capability, managerial excellence, and a results-oriented culture that large-scale clients demand from their trusted project partners.

Company Name	Agex Ventures
Registered Office	Jaipur, Rajasthan, India
Business Type	Infrastructure & Industrial Services
Core Verticals	Civil Construction · Oil & Gas Services
Project Reach	Rajasthan & Pan-India Operations
Contact	+91 91169 06355
Target Clients	PSUs, EPC Contractors, Private Developers, Oil & Gas Majors
Scale Ambition	Multi-Crore Infrastructure Enterprise — ₹100 Cr+ Target

> *Agex Ventures is structured to pursue and deliver multi-crore contracts in civil and energy infrastructure. We operate as a full-service partner — bringing end-to-end project capability, accountability, and institutional-grade processes to every engagement.*

02. VISION & MISSION

Our Vision

To become one of India's most trusted and formidable multi-sector infrastructure enterprises — recognized nationally for engineering excellence, uncompromising safety standards, and the ability to execute large-scale, high-complexity projects that drive the country's development agenda.

We envision Agex Ventures as a name synonymous with reliability and capability in the Indian infrastructure landscape — standing alongside the nation's leading EPC contractors and industrial service providers, contributing meaningfully to the civil, energy, and industrial backbone of a rapidly transforming India.

Our Mission

To deliver superior civil construction and oil & gas services through disciplined project management, advanced technical execution, and an unwavering commitment to quality, safety, and client satisfaction — while building the organizational strength to consistently pursue and successfully execute progressively larger and more complex project mandates.

Our Core Values

- Excellence — We hold ourselves to the highest standards of workmanship and project delivery on every site.
- Integrity — We operate with full transparency, honesty, and ethical conduct in all client and stakeholder relationships.
- Safety First — Health, safety, and environmental responsibility are embedded as non-negotiables across all operations.
- Client Partnership — We align ourselves with our clients' goals and long-term success, not merely their immediate brief.
- Continuous Improvement — We invest in training, technology, and process enhancement to remain ahead of industry benchmarks.

03. CORE SERVICES — CIVIL CONSTRUCTION

Agex Ventures brings comprehensive civil construction capability to projects across residential, commercial, industrial, and infrastructure segments. Our teams are equipped to handle projects of varying scales — from site preparation through structural completion — with consistent quality and schedule discipline.

01. Residential & Commercial Construction

End-to-end construction of residential complexes, apartment towers, commercial office buildings, retail centres, and mixed-use developments. We coordinate design interfaces, manage structural execution, oversee MEP coordination, and deliver finished spaces that meet the expectations of the most discerning developers. Our civil teams operate with precision across multistory structures, high-rise buildings, and large housing projects.

02. Road & Infrastructure Development

Construction and upgradation of national and state highways, urban roads, rural connectivity links, flyovers, bridges, underpasses, and allied infrastructure. Our road teams are equipped for earthwork, sub-base and base course preparation, bituminous paving, storm water drainage, signage, and traffic management systems — meeting NHAI, PMGSY, and state PWD standards.

03. Industrial Projects

Civil construction of manufacturing plants, processing facilities, warehouses, logistics parks, industrial sheds, and factory complexes. We manage civil works for heavy-industry clients with strict adherence to industrial safety norms, heavy-load floor specifications, and utility routing — ensuring facilities are built to support high-productivity industrial use from day one.

04. RCC & Structural Work

Design-coordinated execution of reinforced cement concrete structures, pre-engineered building (PEB) systems, steel fabrication and erection, structural retrofitting, and foundation engineering. Our structural specialists operate with the precision and rigor required for large-span industrial structures, multistorey commercial frames, and specialized civil works in demanding environments.

05. Site Development & Preparation

Comprehensive land development services including topographic survey coordination, earthwork and grading, mass excavation, soil stabilization, retaining walls, boundary infrastructure, access roads, and utility provisioning. We prepare project sites to the exact technical specifications required by architects, structural engineers, and development authorities — ensuring every project begins on solid, compliant ground.

04. CORE SERVICES — OIL & GAS SERVICES

Rajasthan is home to significant onshore hydrocarbon reserves, and India's oil and gas sector continues to attract major investment in exploration, production, and midstream infrastructure. Agex Ventures is positioned as a capable, safety-conscious service partner for upstream and midstream operations across this high-stakes sector.

01. Pipeline Installation & Maintenance

Full-scope pipeline services spanning design coordination, route survey, trench preparation, pipe laying, field joint coating, welding and weld inspection, hydrostatic testing, commissioning support, and long-term maintenance contracts. We handle pipelines for crude oil, natural gas, refined products, and industrial process fluids — in compliance with OISD, ASME, and client-specific standards.

02. Oil Field Support Services

Comprehensive support operations for upstream and midstream oil & gas fields — including civil works at well pad sites, production facility construction, flow line routing, water injection system civil works, access road development, fence and boundary infrastructure, and integrated camp and accommodation setup for field operations.

03. Equipment Handling & Logistics

Specialized services for the mobilization, rigging, transportation, and placement of heavy equipment and critical plant items at oil & gas installations — including turbines, compressors, separators, storage tanks, pump skids, and process equipment. Our logistics capabilities ensure critical assets reach site safely, on schedule, and in full compliance with all regulatory requirements.

04. Industrial Maintenance Services

Scheduled preventive maintenance, corrective maintenance, and emergency breakdown response for industrial process equipment, pipelines, storage and pressure vessels, mechanical rotating equipment, and civil structures at refineries, natural gas processing plants, and upstream production facilities. Our teams operate under strict PTW (Permit to Work) systems to minimize downtime and maintain operational efficiency.

05. EXPERIENCE & TRACK RECORD

Agex Ventures has built its operational foundation through the disciplined execution of civil and industrial projects across Rajasthan. Our experience spans diverse project types, client profiles, and delivery environments — giving us the breadth of knowledge and the depth of field-tested capability that clients require when entrusting large contracts.

Our management team and senior technical staff bring together decades of combined experience from some of India's most demanding civil and oil & gas infrastructure environments. This expertise — spanning project planning, structural engineering, pipeline technology, HSE management, procurement, and contract administration — underpins every project Agex Ventures undertakes.

Operational Competencies

- Multi-discipline project management from concept to commissioning and handover
- Large-scale earthwork and civil foundation engineering for industrial and road projects
- Structural concrete and steel work including multistorey residential and commercial frames
- Onshore pipeline installation, welding, hydro-testing, and commissioning support
- Oilfield civil infrastructure including well site construction and access development
- Heavy equipment rigging, lifting, and installation at industrial project sites
- Industrial maintenance under OISD and Permit to Work protocols
- Site development, leveling, and large-scale project site preparation

Quality & Safety Standards

- Structured QA/QC documentation on all active civil and industrial projects
- HSE plans aligned with OISD, BIS, and client-specific safety requirements
- Regular safety training and toolbox talks for all on-site workforce
- Material testing and third-party quality inspection at key project milestones
- Incident reporting, root-cause analysis, and continuous safety improvement processes

> *Headquartered in Jaipur — the commercial capital of Rajasthan — Agex Ventures is strategically placed to serve both the state's active civil construction market and the oil & gas operations centered around the Barmer-Sanchore basin, home to India's largest onshore oil discovery.*

06. WHY CHOOSE AGEX VENTURES

In a competitive infrastructure market, the decision to award a contract is ultimately a decision about trust — trust in a partner's capability, integrity, and commitment to delivering results. Here is why leading clients choose Agex Ventures:

▸ Integrated Dual-Domain Capability

Very few contractors in India offer genuine, field-tested capability in both Civil Construction and Oil & Gas Services. This integrated competence allows clients to appoint Agex Ventures as a single, accountable partner for projects spanning both domains — eliminating coordination risk and reducing total project management overhead.

▸ Disciplined On-Time Delivery

Schedule performance is fundamental to our project culture. We invest heavily in pre-project planning, work breakdown structuring, resource scheduling, and real-time milestone tracking to ensure that project timelines are met with minimal deviation. Our clients do not face surprises at handover.

▸ Uncompromised Quality

From the procurement of raw materials to final quality inspections, Agex Ventures applies rigorous QA/QC processes at every project stage. Our work consistently meets or exceeds relevant Indian and international standards, and we maintain comprehensive documentation to support client audits at any stage.

▸ Safety-First Operations

HSE is a non-negotiable operational principle. Every Agex Ventures project site operates under a formal safety plan, and our workforce is trained in site-specific and sector-specific safety protocols. We maintain zero tolerance for unsafe practices and track safety performance as a core business metric.

▸ Scalable Execution Capacity

Whether the scope calls for a focused site development engagement or a full-scale multi-crore EPC execution, Agex Ventures has the organizational agility to scale its resources, manpower, and equipment in proportion to project demand. We grow with our clients' ambitions.

Transparent Client Partnership

We operate with full transparency in project reporting, cost management, and communication. Clients always know where their project stands on schedule, budget, and quality. This commitment to open, honest engagement is the foundation of the long-term partnerships we build.

07. FUTURE GOALS & ROADMAP

Agex Ventures is not merely a project executor — we are a company with a clear and ambitious vision for our own growth. We are systematically building the financial strength, organizational capability, technical credentials, and market relationships required to operate at the scale of India's largest infrastructure contracts.

→ **Scale to ₹100 Crore+ Annual Revenue —** Actively building the financial infrastructure, credit relationships, and project delivery systems required to pursue and execute multi-crore contracts — with a clear roadmap to achieving ₹100 Crore+ in annual revenue within the next three years.

→ **Expand Pan-India Operational Presence —** From our established Rajasthan base, expanding strategically to high-growth states — targeting Gujarat, Madhya Pradesh, Uttar Pradesh, and the NCR infrastructure corridor — where large civil and energy infrastructure projects are actively underway.

→ **Secure PSU & Tier-1 EPC Contract Awards —** Building technical prequalification credentials and ISO certifications required to register as a vendor and subcontractor for ONGC, IOCL, BPCL, NHAI, and CPWD, as well as Tier-1 EPC contractors across India.

→ **Build a Certified 500+ Strong Workforce —** Investing in NSDC-aligned workforce training to develop a 500+ strong certified workforce qualified in structural construction, pipeline operations, safety management, and equipment handling.

→ **Achieve ISO 9001 & ISO 45001 Certification —** Obtaining ISO 9001 (Quality Management) and ISO 45001 (Occupational Health & Safety) certifications to formalize internationally benchmarked quality and safety standards — a prerequisite for large public and institutional contracts.

→ **Technology & Digital Project Management —** Adopting ERP-based project tracking, BIM-coordinated design execution, drone-based site surveys, and digital HSE management systems to sharpen execution performance and reporting transparency.

> *"India is building at a pace the world has never seen. Agex Ventures intends to be at the heart of that transformation — laying foundations, laying pipelines, and laying the groundwork for a stronger nation."*
>
> **— Agex Ventures — Corporate Vision Statement**

08. CONTACT INFORMATION

Agex Ventures welcomes enquiries from developers, PSUs, EPC contractors, oil & gas operators, and project owners seeking a reliable, capable, and ambitious infrastructure partner.

Company	Agex Ventures
Registered Office	Jaipur, Rajasthan, India — 302001
Phone / WhatsApp	+91 91169 06355
Civil Enquiries	Residential, Commercial, Roads, Industrial & Structural Works
Oil & Gas Enquiries	Pipeline Projects, Oilfield Support, Equipment Handling & Maintenance
Business Hours	Monday to Saturday: 9:00 AM – 7:00 PM IST
Emergency Contact	Available 24 / 7 for active project sites
